AN ALPHABETICAL LIST of all the **STREETS, LANES, ALLEYS, QUAYS, SQUARES, COURTS, YARDS, &c.** in the **City and Suburbs of DUBLIN**; with their **Situations** in respect to each other; and **References** for finding them in the **PLAN**, which is divided into **WARDS**, for the more easy ascertaining the **Rates of Carriages**.

Example. To find **Smithfield**. In the *List of Streets*, **Smithfield** is situated near **North King-street**, and the letters of reference are **E c d**. Then turning to the **Plan**, and passing the eye downwards under the great letter **E**, and sideways opposite the small letters **c** and **d**, you will find the situation of the place wanted. Where the place is too inconsiderable to be particularly mentioned, without over-crowding the **Plan**, the letters of reference, in that case, are to the next considerable street, and the situation, by that means, may be nearly found.
